

<b>JOB TITLE:</b>	Business Process Improvement Analyst
<b>REPORTING TO:</b>	Business Improvement Manager
<b>DIRECT REPORTS:</b>	None
<b>JOB LOCATION:</b>	Woolpit
<b>JOB PURPOSE:</b>	To drive a continuous improvement culture by undertaking 'as-is' processes analysis. Identify innovative solutions which provide 'future state' processes, a unified user experience and enable business efficiencies, improve productivity and performance across the Group.

## Responsibilities

- Work cross functionally and with stake holders to review current processes, analyse root cause defects and advise on possible business improvement to enable efficiencies, improved productivity and appropriate cost savings.
- Document "as-is" workflow processes to enable identification of the current process, key milestones, and opportunities for process optimization.
- Design "to-be" workflows, process strategies, and provide documented flow charts to enable implementation of opportunities identified.
- Act as a change agent to install lean methodology by ensuring simplification and streamlining for the end user and ensuring consistency.
- Lead and work with stakeholders on solution implementation to ensure new processes are successfully embedded.
- Report on project updates in a timely manner to ensure all stakeholders are appropriately communicated with and informed on the status of project projects.
- Any other duties as required by the manager.
